DETAILED ACTION

EXAMINER'S AMENDMENT

1. Authorization for Examiner's Amendment was given by Bradley K. Lortz in a telephone interview on 11-27-06.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
3. The application has been amended as follows:
 2. (Canceled)
 19. (Currently Amended) A digital data processing method accessing a peripheral device, the method comprising
intercepting, with a filter driver executing on a first node, a request ("first access request") by that node for access to the peripheral device,
at least initiating transfer of the data designated by that request between the first node and the peripheral device using file mapping obtained from a second node;
wherein the initiating step includes at least initiating transfer of data designated by the first access request between the first node and the peripheral device over a communications pathway that differs from that over which a file system executing on at least one of the first and second nodes would transfer data in response to the first access request.
 25. (Canceled)

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 2-24 and 26-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-38 of U.S. Patent No. 7,010,432. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims of U.S. Patent No. 7,010,432 contain every element of claims 2-24 and 26-40 of the instant specification.

"A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or anticipated by, the earlier claim. *In re Longi*, 759 F.2d at 896, 225 USPQ at 651."

6. Claims 2-24 and 26-40 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-55 of copending Application No. 11/179201. Although the conflicting claims are not

identical, they are not patentably distinct from each other because the subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the instant application are claiming common subject matter and they are substantially similar in scope and they use the same limitations, using varying terminology. They are not patentably distinct from each other because claims of copending Application 11/179201 contain every element of claims 2-24 and 26-40 of the instant specification.

“A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or anticipated by, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651.”

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
